

AT LAST. COLOR GRAPHICS IN DISTRIBUTED PROCESSING...

THE SYSTEM

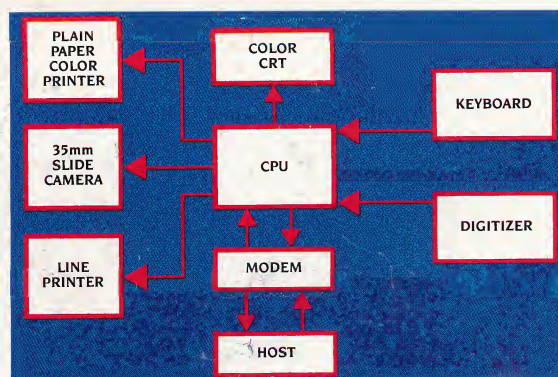

Introducing "TREND-SPOTTER '82"™
from Computer Pictures Corporation.
The most powerful Business Graphics System
available today.

If the management of your Company is asking for graphics, the "Trend-Spotter '82" Graphic Management Information System is the ideal way to get it in-house.

"Trend-Spotter '82" is a true distributed processing system. It can be fully functional and up and running in one day without degrading the response time of your mainframe. It can also be interfaced with, and draw data from, a host, and will give you graphics faster and at less cost than any other method.

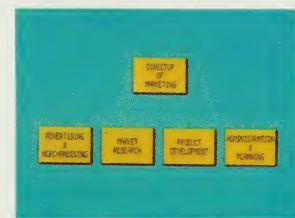

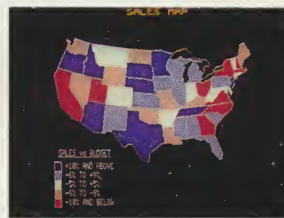

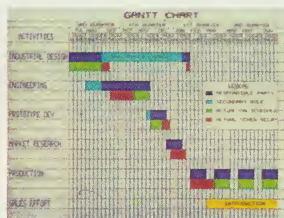

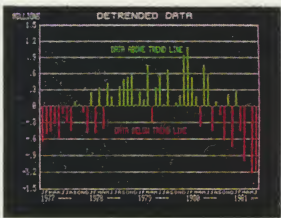

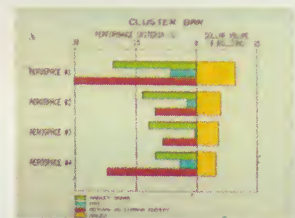

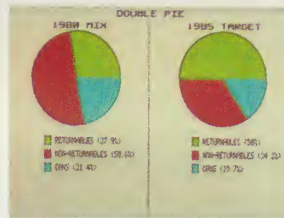

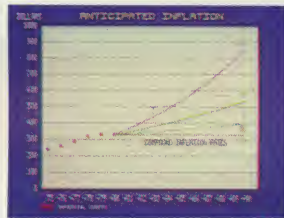

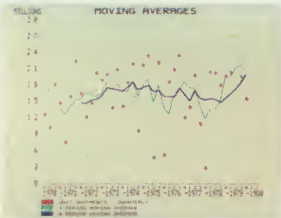

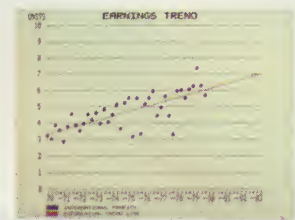

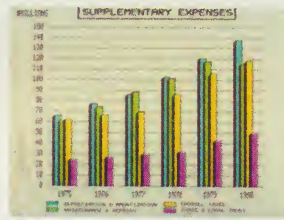

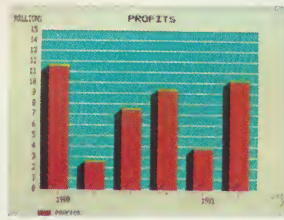

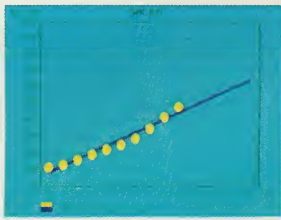

The System also does not require computer operating experience. All operations are in plain language, and instructions are clearly and simply written. In fact we guarantee that your Managers, and their staff, will be producing color charts and graphs on the day of installation.

"Trend-Spotter '82". It's the one business graphics system designed to satisfy all the needs of today's business managers and their E.D.P. management.

...COMBINES BUSINESS GRAPHICS WITH POWERFUL ANALYSIS TOOLS.

AT WORK

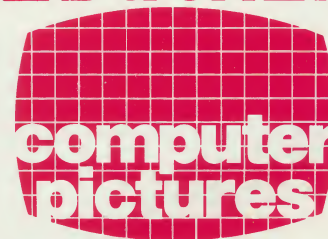

Here are just a few of the thousands of color charts "TREND-SPOTTER '82"™ will produce for you.

In use "Trend-Spotter '82" gives immediate color graphics on the screen, AND allows the user, at will, and instantly, to transfer any graphics to plain paper copies, overhead transparencies or 35mm slides, all in brilliant color. However, it is much more than just a Presentation Graphics system. "Trend-Spotter '82" comes complete and ready to produce *Information Graphics*, too. The most powerful combination of statistical and analytical functions enable the system to manipulate and interpret data. On command it will display graphic solutions to questions regarding trends, forecasting and business analysis. It will also create 'what-if' scenarios for any organization and present its conclusions graphically.

Users report that "Trend-Spotter '82" quickly becomes a doubly-useful management tool. It provides color graphics faster, cheaper and easier than any other method. Then, because of the analytical capabilities, it also proves to be a unique and valuable aid in the making of day-to-day management decisions.
